ABOUT ME

Hi! I'm Jimmy, a fullstack web developer. I love learning how to replicate complex projects that I occasionally stumble on, my passion lying in creating ideas and products that people would like to use.

Outside of programming, I enjoy teaching, historical analysis, mythology and digital art!

WORK EXPERIENCE

● April 2022 - Present

Head of Technology

As Head of Technology for Ngee Ann's Overflow Technology Special Interest group, I was in charge of planning and organizing our weekly workshops and biannual bootcamps. I was also behind the development of many of the SIG's products such as it's Open House exhibits and the current [Overflow website](#)

● March 2022 - Present

Nullspace STEM Instructor

As a STEM Instructor for [Nullspace](#), my work involved teaching children ages 5-13 robotics and programming. I took up this job as I have been working with robotics, more specifically LEGO robotics for over 10 years as both a student and now a teacher.

● April 2019 - 2020

Chairman of Robotics Club

As the Chairman of Robotics Club for Chua Chu Kang Secondary. I was responsible for the organization and planning of Co-Curricular Activities for the club, including but not limited to the yearly CCA bonding camp.
